

SNUG MAT 200W/m²

200MAT

Snug Mat 200W/m²

OVERVIEW

The Snug Mat is a triple-insulated Class 2 heating mat and is designed to be the single or primary heat source in a room. The twin conductor, single-connection heating cable is woven on to an adhesive backed fabric mesh that not only holds the heating cable together, but means the mat stays flat as soon as it's laid out to simplify installation.

Manufactured in a wide range of ready-made sizes and with the supply lead wire at one end only. This design offers maximum flexibility to the installer; is easy to plan and lay; and is suitable for large or small areas.

KEY FEATURES

- Extra powerful underfloor heating
- Designed to be the single or primary heat source
- Ideal in lounges, kitchens or conservatories
- Suitable under ceramic tile, slate, terracotta, stone, limestone or marble
- One of the thinnest on the market at just 2mm
